Chapter 1. Getting Started

YouTube (YT) is a free video sharing platform developed by Google. You can access the YouTube application on web browsers, android, and iOS devices.

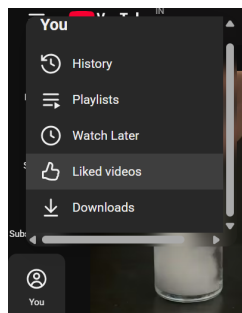

YouTube allows you to watch, upload, and share videos on a wide range of topics, including entertainment, education, news, and music.

What you can do on YT

- Watch videos and live streams.
- Upload videos and shorts.
- Create community posts.
- Subscribe to channels and receive updates.
- Save videos to playlists and watch later.

What you will find on YT

- A personalized **Home** feed based on your interests.
- The **Search** bar to find specific videos or channels.
- A **Notifications** bar displays channel updates and activity notifications.
- A **Subscription** tab to follow your favourite creators.
- A **You** tab to access your watch history, watch later, downloads and saved playlists.

- A **Shorts** tab for quick vertical videos.

Chapter 2. Playing Videos on YT

This section guides you on how to play, pause and control videos on .YT

Ensure you have an active internet connection and the YT application is open.

1. Click on a video to open it.
2. The video will begin playing automatically.
3. To manage your playback, use the following controls:
 - Click **Pause** to stop a video.
 - Click **Play** to resume a video.
 - Drag the **Progress Bar** (the thin line at the bottom of the video), to skip forward or backward.
 - Click the **Full Screen icon** to expand the video.
 - Click **Settings** to adjust the video quality and playback speed.
4. Click the **Back** button to exit the video and return to the Home page.

Chapter 3. Uploading a Video

Upload a video to YT and share it with viewers on your channel.

- Sign in to your account.
- Ensure that you have a stable internet connection
- Save the video that you want to upload on your device.

1. Tap the **Create (+)** button.
2. Select **Video**.
3. Choose the video that you want to upload from your device.
4. Enter a title for the video.
5. Select the audience setting (**Made for kids** or **Not made for kids**).
6. Select the visibility setting (Public, Unlisted, or Private).
7. Tap Upload to publish the video.

The Video is uploaded to YT and becomes available according to the selected visibility setting.

Chapter 4. Creating a Short

Create and publish a YT Short to share short-form video content with your audience.

- Sign in to your YT account.
- Ensure that you have a stable internet connection.
- Prepare a video clip or be ready to record a Short.

1. Tap the **Create (+)** button.
2. Select **Short**.
3. Record a video using the camera or upload an already recorded video from files.

Note:

You can use the [tools \(on page 6\)](#) available on the right side of the screen to enhance your Short.

4. Tap **Next**.
5. Add a caption for your short on the **Add Details** screen.
6. Tap **Upload Short** to publish your short (or) Tap **Save Draft** to save it for later.

Your Short is uploaded and becomes available on your channel according to the visibility settings you selected.

Tools for Creating Shorts

You can use various recording and editing tools while creating a YT short. These tools help you customize the video by adjusting the camera, recording settings, visual effects, and lighting before publishing the short.

Tool	Description
Flip	Switches between the front and rear cameras.
Timer	Sets a countdown before recording starts.
Duration	Changes the maximum length of the short.
Effects	Applies visual effects and filters to the video.

Tool	Description
Speed	Adjusts the recording speed of the video.
Green Screen	Replaces the background with an image or video.
Retouch	Enhances the appearance of the video.
Lighting	Adjusts the brightness of the recording.
Flash	Turns the camera flash on or off.
Trim	Shortens the video by removing unwanted portions of a clip.
Align	Helps position the next recording segment by displaying the previous frame for smoother transitions.
Close	Hides the tools panel.

Chapter 5. Creating a post

Create and publish a community post on YT to share text, images, polls, or quizzes on your channel.

- Sign in to your account.
- Ensure that your channel has access to post feature.
- Ensure that you have a stable internet connection.

1. Click the Create (+) button.
2. Select **Post**.
3. Enter the text for your post.
4. Add an image, poll, or quiz.

Remember:

Review the content of the post before publishing it.

5. Click Post located at the top right corner to publish it.

The post is published on your channel's Community tab and is visible according to your channel settings.

Chapter 6. Starting a Live Stream

Start a live stream on YT to broadcast video content to your audience in real time.

- Sign in to your account.
- Ensure that your channel is eligible for live streaming and that the feature is enabled.
- Ensure that you have a stable internet connection.

1. Tap the **Create (+)** button.
2. Select **Live**.
3. Enter a title for the live stream.
4. Select the visibility setting (Public, Unlisted, or Private.)
5. Set the audience setting to indicate whether the content is made for kids.
6. Tap **Next**.
7. Create a thumbnail for the live stream.
8. Select **Schedule for later** and specify the date and time to schedule the live stream.
9. Tap **Go live** to start the broadcast immediately or **Schedule** to start it later.

Chapter 7. Managing your YT account

The **You** tab provides quick access to your account options, watch history, saved playlists, and downloads.

Option	Description
Switch Account	Allows you to change to a different Google account.
Google Account	Helps you manage your google account settings.
Turn on incognito	Allows you to browse YT without saving your watch history.
History	Allows you to view your recently watched videos.
Playlists	Allows you to access your saved and liked video playlists.
Your Videos	Allows you to view and manage videos you have uploaded.
Downloads	Allows you to access videos saved for offline viewing.
