

Instagram Release Notes

Version: August 2026

Release Date: August 2026

What's New

- Instagram now allows photo comment feature under posts.
- Instants feature allows spontaneous sharing of unedited photos with friends.
- Blend feature creates a shared Reels feed with friends in DMs.
- Instagram lets users add content directly to Highlights without posting it on stories first.
- Instagram allows users to share their location and view their friend's location through the Instagram Friends Map.

Improvements

- Edits app now allows sharing drafts via DMs for faster collaboration.
- AI-powered effects can now be applied to specific people or objects in Edits.

Bug Fixes

- Performance and stability improvements across Android and IOS devices.

Known Issues

- Some new features may not be available in all regions at this time.
